The Merging of Knowledge

A deeply participatory approach

Dr Rachel Bray

Research Associate

Department of Social Policy and Intervention

University of Oxford

Why did we choose the *Merging of Knowledge?*

SDG Target 1.2 to halve poverty *in all its dimensions*

- But what are the dimensions of poverty and who should decide them?

We set out to design research that

- prioritises the knowledge of people experiencing poverty
- merges this with the knowledge of practitioners and of academics/decision-makers

What is the *Merging of Knowledge* and how does it work?

- An approach to research and practice, founded on principles
 - **Full citizenship for all**; every person's knowledge counts
 - **Guaranteed equality**; addresses inherent power dynamics
- Based on the idea that our knowledge derives from our lived experience

Direct experience of poverty Professional practice Academic research

Steered by a team of co-researchers from all backgrounds (**half living in poverty**)

Follows steps:

- ⇒ Work in peer groups (20 - 30 hours)
- ⇒ Synthesis of conclusions from each knowledge group (by steering team)
- ⇒ Collective analysis by representatives from all **three** groups (3 - 10 days)

Merging of knowledge

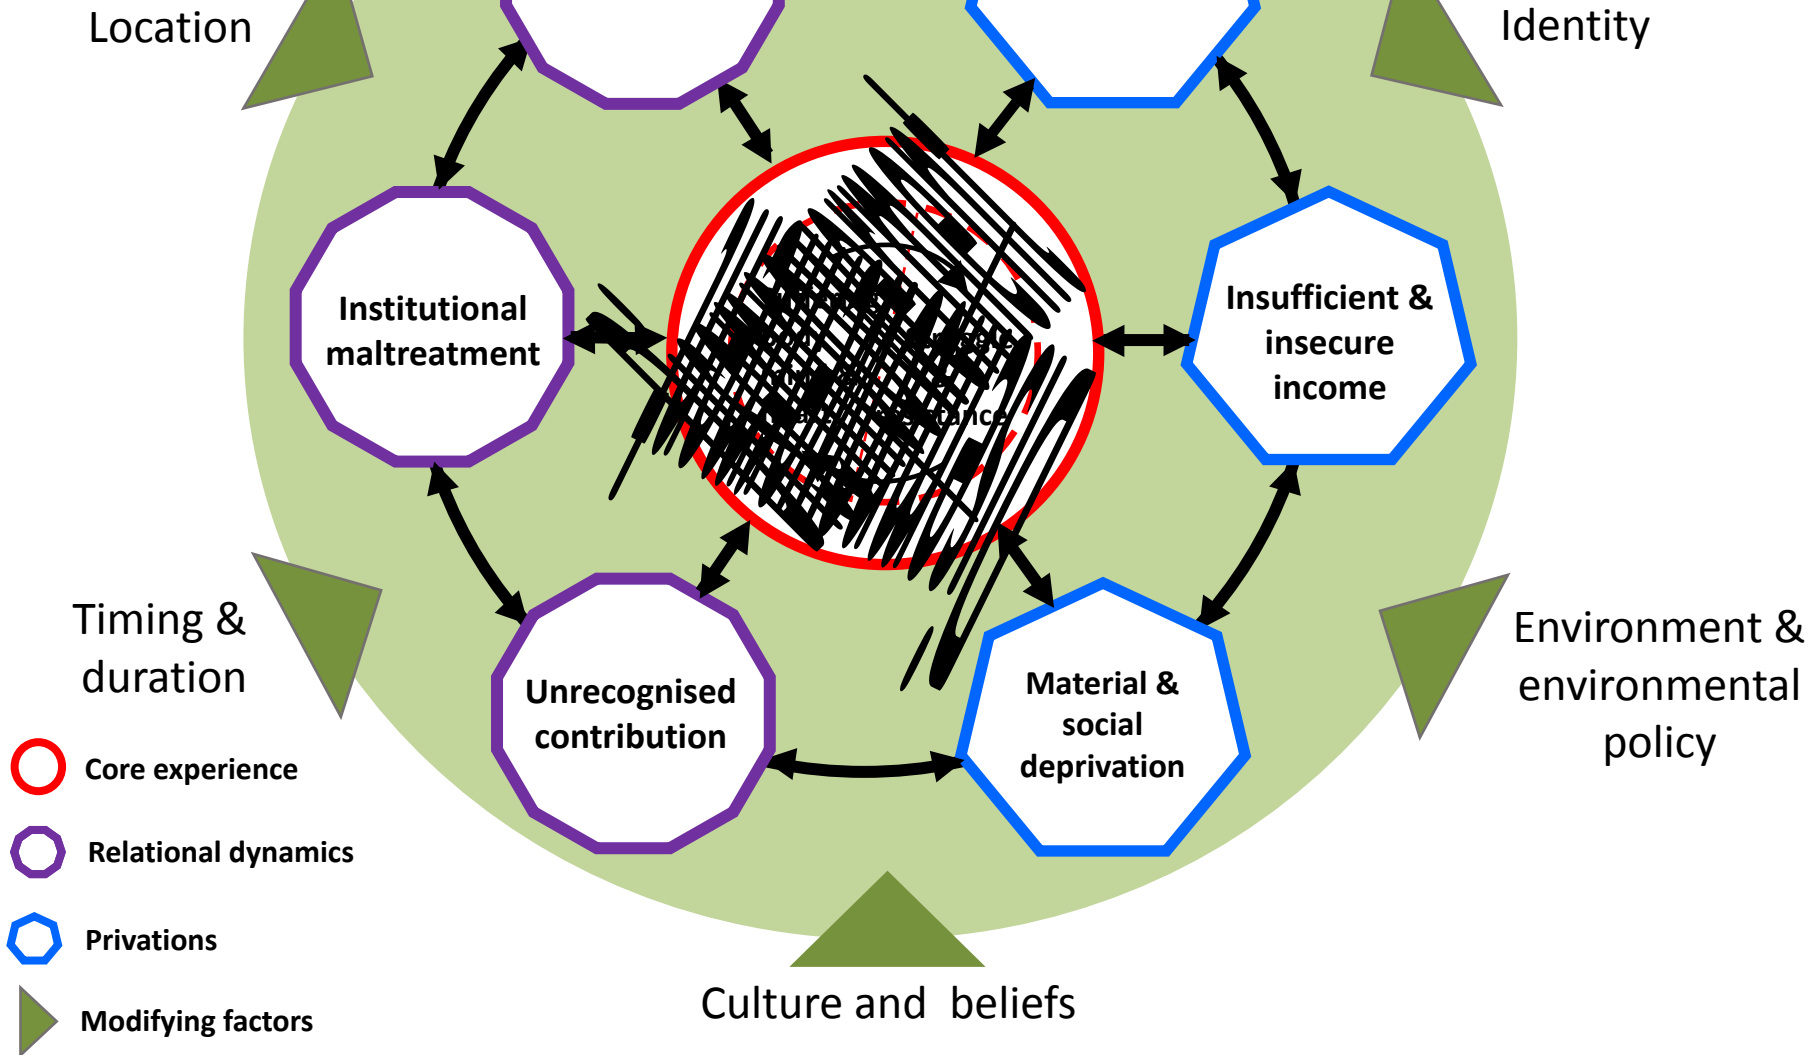

Time and money to support a steady process

Merging of knowledge => **new** knowledge

via mutual recognition, trust and reflective questioning

As importantly, the process achieved...

Grounding for lasting change

- Transformation for all people/organisations involved
 - Action follows the deep attitudinal change in ***everyone***
 - New ways of thinking about poverty
 - *New ways of working...??*
- Partnerships between institutions evolve naturally
 - as grounded in deep collective analysis

Challenges and how to meet them

- Requires much time, skill, commitment
 - *Invest wisely to ensure value for all*
- Choice of stakeholders as peer groups
 - *Adapt to the question and context*
- Coping with difference when ‘merging’
 - *Record process towards consensus*
 - *Respect disagreement, retain specificity*

Clear potentials for the Merging of Knowledge

- Further work with children and with older people
- Developing further indicators for SDG target 1.2
- Use in policy-making...
