OBJECTIVES

NEW

Latest methodologies and approaches

Making progress in the implementation of SDGs

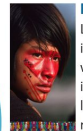

Contributing to sustainable recovery of the COVID-19 pandemic

By leveraging expertise from multi-stakeholder partners

Part 1:
Learn an Open Online Course "Integrated Recovery Planning and Policy Coherence towards the SDG's" and its 5 Modules.

Part 2:
Learn training opportunities for integrating space-based solutions with Indigenous Knowledge including participatory community-led methods and planning for recovery that goes beyond 2030.

Part 3:
Learn about local resilience assessment tool "Views from the Frontline (VFL) Lite" to understand the unique resilience challenges faced by communities, and local perspective for inclusion in governance structures.

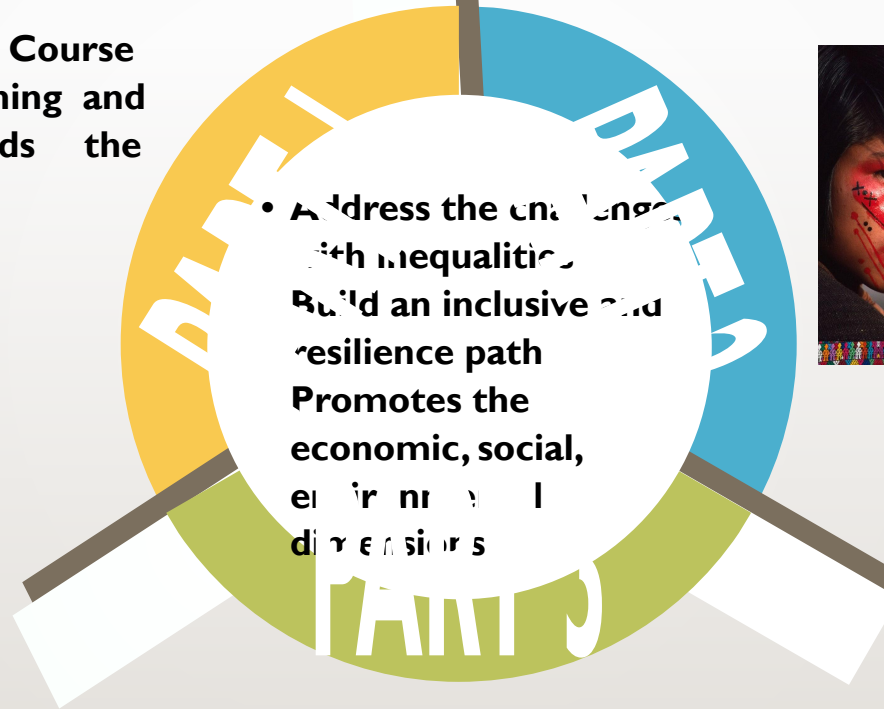

STRUCTURE

Part 1:

Learn an Open Online Course “Integrated Recovery Planning and Policy Coherence towards the SDG’s” and its 5 Modules.

- Address the challenges with inequalities
- Build an inclusive and resilience path
- Promotes the economic, social, environmental dimensions

Part 2:

Learn training opportunities for integrating space-based solutions with Indigenous Knowledge including participatory community-led methods and planning for recovery that goes beyond 2030.

Part 3:

Learn about local resilience assessment tool “Views from the Frontline (VFL) Lite” to understand the unique resilience challenges faced by communities, and local perspective for inclusion in governance structures.

EXPECTED OUTCOME AND NEXT STEPS

Increased awareness of UNDESA-UNITAR Open Online Course available for national stakeholders and everyone involved in recovery planning from COVID-19 pandemic and rebuilding back better towards the SDGs

Supporting Indigenous sustainability's by developing integrated knowledge forms and applications work together without boundaries.

Capture the specific social, economical, and environmental threats and vulnerabilities faced by the displaced population

Contributing to "Sustainable and resilient recovery from the COVID-19 pandemic"

The approach and course structure

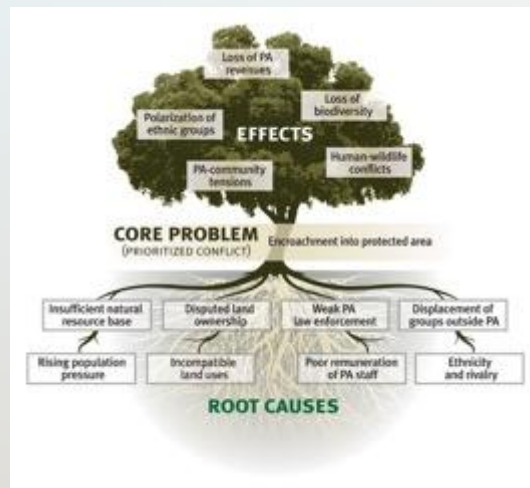

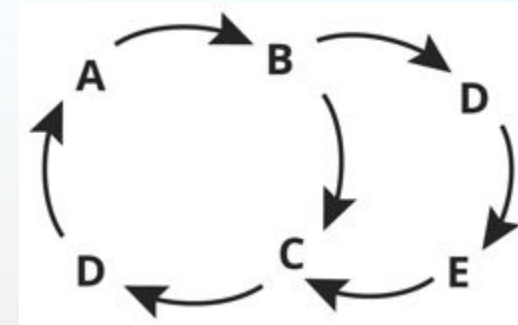

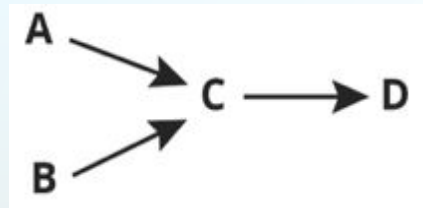

Click on a section to view more information.

STEPWISE APPROACH - Participatory, Qualitative, Quantitative

From linear problem-tree analysis to system maps

Picture source: IISD.

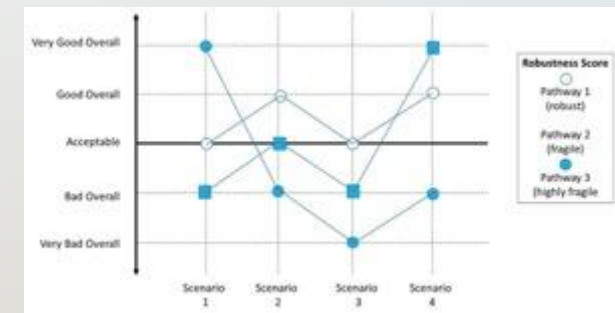

Causal Loop Diagram (system map), Costa Rica & UNDESA

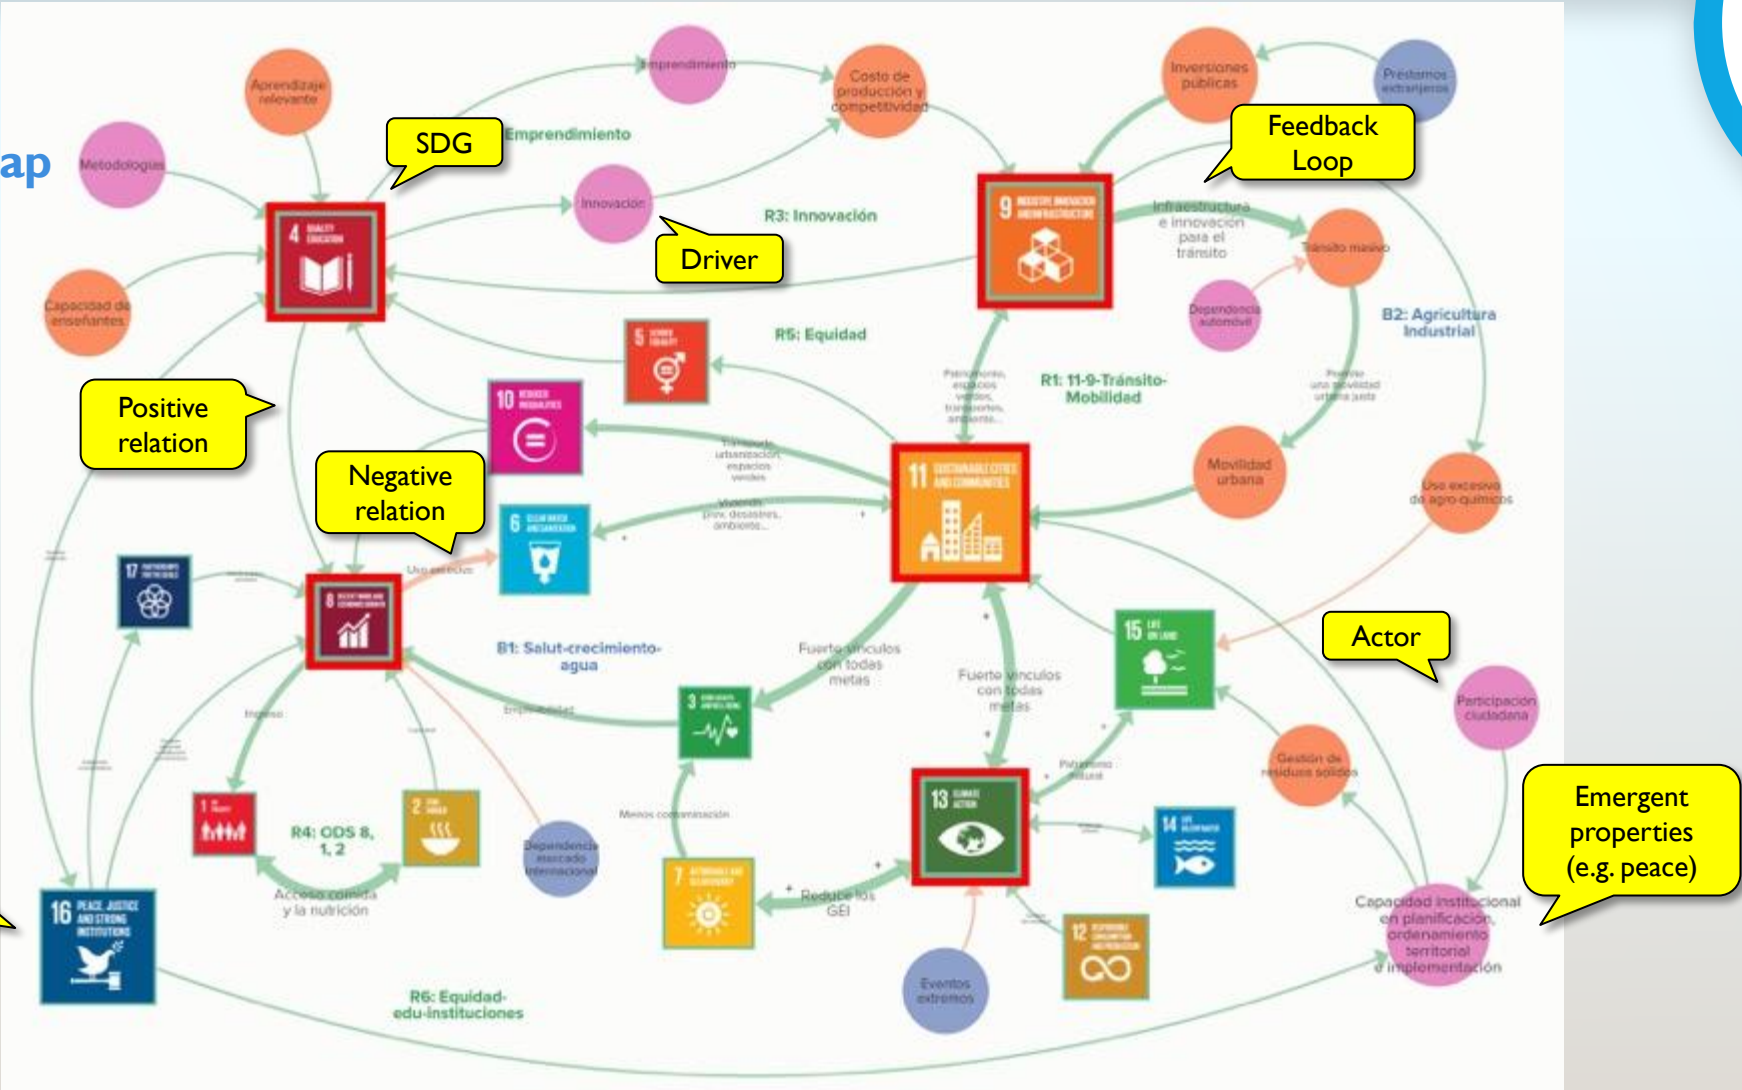

Identify policy pathways that are:

- **Transformative:** address the leverage points
- **Coherent and strategic:** make sense when combined, with minimum trade-offs
- **Robust and adaptive:** can perform across a range of plausible scenarios

Leverage points & system map

Policy options
matrix

Policy Objective #3
Sustainable Recovery and Protecting the Planet

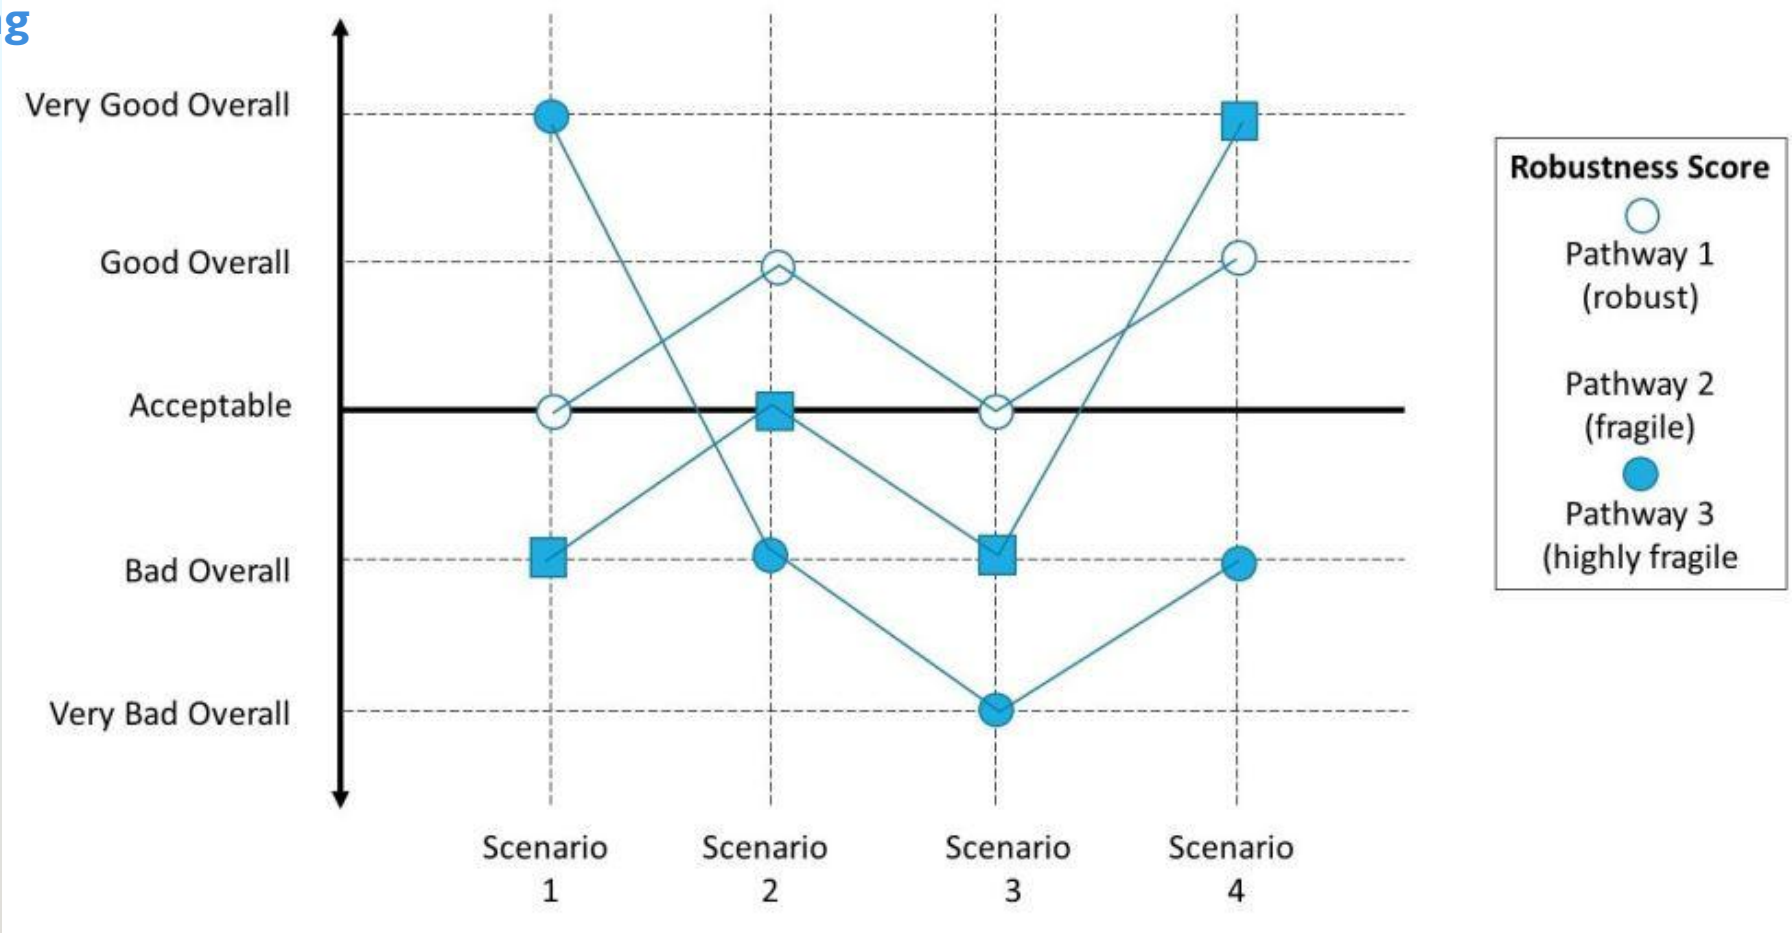

Potential Impact	5 Very High		F	B, I	E, O	
	4 High	P		C, D, H	A	J, L
	3 Moderate			G, M	K	Q
	2 Low				N	
	1 Very Low					
Impact-Achievability Matrix	Achievability					
	1 Very Low	2 Low	3 Moderate	4 High	5 Very High	

- Very low overall potential for impact and achievability
- Low overall potential for impact and achievability
- Moderate overall potential for impact and achievability
- High overall potential for impact and achievability
- Very high overall potential for impact and achievability

Robustness testing
