Multi-stakeholder platform: mobilization of different actors and resources

Objective: a permanent working relationship between organizations from different sectors, combining their resources, competencies and interests and sharing risks to achieve agreed shared objectives, while each achieves its own individual objective.

Multi stakeholders Platform: organization chart

LEVEL 1: Executive Committee (11 members)

LEVEL 2: Working Groups

TERRITORIAL

Outcomes

- The Agenda 2030 for Sustainable Development and its SDGs comes from an **intergovernmental, open and inclusive process and with the participation of non-governmental actors.**
- It is necessary to consolidate strategies as the SDG Multi-stakeholders Platform, that benefit the easy **creation of links and unions that facilitate the progress of indicators and benefit the projections** that are made by the Government for the future.
- Likewise, **strengthen the incidence of the actors that participate in these spaces in the decision-making of the national government**, in such a way that the perspective is broadened and the interests and needs of the different development groups are included.
