

Statement by Zenabou SEGDA on behalf of WMG

Thank you Chair for giving the WMG this opportunity to deliver to you our red lines and ask for a few reviews:

- In Paragraph 3 of Declaration,
 - o we would like to replace “promote” by “**realize**” gender equality;
 - o And right after that, add **to address climate change, change development patterns;**
 - o Another point is that instead of “economic growth”, to put “**economic development**” systematically throughout the whole document.

- In paragraph 8 and 28, we would like to add after “reliable” the word “**safe**” relatively to energy;

- In paragraph 10,
 - to add a sentence after the second one as following : **A world in which decisive action has been taken to address climate change and ecosystems are restored and protected,**
 - in the sentence beginning with “One in which development” we would like to see **Gender-responsive, socially and environmentally safe** , before “respect biodiversity”.

- in paragraph 31,
 - o we are still asking for more ambition (referring to IPCC, Report 5) and our option is **1.5** not 2;
 - o also we propose to replace “reduction” by “**phrase out**” of greenhouse gas emission;
 - o a missed and very important word in this paragraph is “**adaptation**” and **the commitment to provide means for effective implementation which is urgent especially in vulnerable countries in global south;**
 - o Finally, this paragraph needs to fully recognize **CBDR**, as CBDR is the way to ensure universality and differentiation, and is a long-agreed and well-established principle of sustainable development. We support the text in brackets.

I thank you so much
