Take urgent action to combat climate change and its impacts

Highest-ever greenhouse gas emissions reveal a global failure to meet climate goals

Total net anthropogenic greenhouse gas emissions, 1990–2022
(gigatons of CO₂ equivalent)

Another broken record – 2023 was the warmest year yet

GLOBAL AVERAGE TEMPERATURES SOARED TO
1.45°C ABOVE PRE-INDUSTRIAL LEVELS

Take urgent action to combat climate change and its impacts

In 2022, the \$100 billion climate finance goal milestone was met, while concurrently fossil fuel subsidies hit a historic high- exceeding \$1.5 trillion

In 2022, the \$100 billion climate finance goal milestone was met

Global estimate of fossil fuel subsidies, 2010–2022 (billions of dollars)

Take urgent action to combat climate change and its impacts

As disasters become more probable, better preparedness has lowered mortality rates

Globally:

**Disaster mortality dropped 49% ↓
from 2005-2014 to 2013-2022.**

**↑ Persons affected by disasters
rose 69% from 2005-2014 to
2013-2022.**

However, in LDCs:

**Disaster mortality is 170% higher
than the global average.**

**The disaster-affected population
is 20% higher than the global
average.**
