# SCP meets SDG

Ulf Jaeckel

Federal Ministry for the Environment, Nature Conservation,  
Building and Nuclear Safety, Germany

Federal Ministry for the Environment, Nature Conservation, Building and Nuclear Safety

Is this SCP?

## What does SCP mean?

- **SCP is about daily life decisions and its environmental, social and economic consequences, e.g.**
- More than 70% of GHG globally are caused by consumption decisions
- People in `consumer class´ own 10000 items each (resource use)
- Consumption decisions directly or indirectly determine working conditions, job creation, social welfare as well as the economic situation of people, companies, countries

# Everybody is involved

- SCP involves all
  - Consumers,
  - Producers,
  - Stakeholders,
  - Governments
- 10 YFP is the global mechanism for SCP
- 10 YFP addresses the issues people care about
  - Food
  - Education, lifestyles,
  - Consumer information
  - Tourism
  - Building, housing

## What can SCP contribute?

- Transition to more sustainable consumption and production is a must for economic, social and environmental reasons
- SCP addresses peoples needs (from basic to high-end)
- SCP provides platforms for concrete cooperation (in particular programmes of 10 YFP)
- Gives everybody the chance to do something good for sustainable development
