Mr. Chairman,

Let me express my appreciation for the excellence presentation delivered by the panelists.

As we all aware, there are many excellence examples and success stories on Public Private Partnerships (PPP). While the PPP's initiative has given benefits to many countries, Indonesia believes that there is still a room for improvement such as by getting more actors to involve in this initiative taking into account that we still have a great numbers of potential strategic partners.

In order to increase the benefits of the PPP's initiative, establishing a policy framework to support effective partnership between public and private sectors, including setting up clear criteria and screening process, is inevitable.

In this connection, Indonesia supports the involvement of responsible partners which have experience in implementing sustainable development concept in this PPP's initiative.

I thank you.
