VNR REPORT 2024
VOLUME 2
DATA TABLES
VNR-24 incorporates 115 SDG targets into Palau’s National SDG Framework. Of these, 34 (30%) are on track to be achieved by 2030; 53 (46%) are progressing but will require additional effort to meet the 2030 timeline; 9 (8%) need action to reverse current trends; and 19 (16%) could not be quantitatively assessed either due to insufficient data points or there not being a clearly defined target to measure progress.

Indicators that support target assessment are contained in the following tables. The tables for VNR-24 have been placed in a separate volume to make it easier to condense and share.
